DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Proper headings is requested throughout the specification.

Information Disclosure Statement

Applicant's representative is required to update the date information in the 1449 to replace the question mark. Appropriate correction is required.

Claim Objections

Claims 11-27 are objected for the following reason. The examiner would like to remind the Applicant that reference numerals might be used inside of parenthesis. However, these reference numerals must be the same as the means that they represent in the specification to avoid confusion. This objection is not used to reject the claims. It is suggested to remove the reference numerals to avoid confusion. See MPEP § 608.01(m).

Claims 20-27 depend from a cancel claim 1. Applicant is advised to change the dependency of these claims to a non-cancel claim. Appropriate correction is required.

Allowable Subject Matter

Claims 11-27 are allowed.

The prior art fails to disclose a vehicle combination comprising a receiving unit in communication with a control unit , the receiving unit used to receive position data of a harvester such that the control unit can be operated to automatically control the transport vehicle in relation to the position of the harvester so as to receive harvested crops from the harvester, wherein the control unit is operated to automatically drive the transport vehicle to collect crops from the harvester during travel, and wherein the transport vehicle is unmanned.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
